

Dear Recruiters at Tampere University,

I am a Canadian citizen currently living in China looking to expand my career in research. I believe a new era is imminent and we can be a big part of it.

I have worked as a research assistant at California State University, Northridge for 2 years. I have conducted several research and experiments independently, from coding the software and collecting data to writing papers and patents. I am an experienced researcher.

I have also created several games in Unity 3D, and I am a Medium writer who had several curated articles. Some of my articles were also published on other platforms upon request. I have strong coding skills as well as writing skills.

During my time at school and work, I have filed several patents related to the field I work closely with. I am looking to expand my career in the field of research because I am a creative individual who wishes to make an impact on this world with my creative ideas and dedication to technology.

This position at Tampere University will surely accomplish my goals.

Sincerely,  
Shen Huang
